For the growing family on the move. The Sandalwood allows for spacious living with plenty of room for storage with various walk-in closets and a two-car garage. This floorplan tops out at 2,842 square feet with 4 bedrooms, a loft, and two full baths. The first floor has a great flow for that after-work busy lifestyle. The kitchen, great room, dining room, and breakfast nook all connect with minimal walls cutting off the open concept plan. If more room is what you need on this floor, look into adding on the extended breakfast area or going gourmet with the kitchen layout which includes double ovens. Additionally, the first floor has a guest suite, which if needed can be converted into an office, gym, or media room. You additionally have the option to make the first-floor powder room into a full bath depending on your needs. Right outside this area, you will be happy to find a walk-in closet and a designated drop zone bench area that leads to the garage. Upgrade this home to have a covered rear porch instead of the patio or add on a wrap-around front porch
